DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 25 and 26 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. These claims recite molding reinforcement strips into the mirror housing. However, there is no support or teaching in the specification for such an arrangement. The specification teaches molding reinforcement strips into a "build-up" element inside of the mirror housing, but not into the housing itself. Accordingly, the particular manner in which said molding would be accomplished is unclear.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 20-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Huizenga et al 5900999.

Huizenga shows a vehicle mirror assembly including a support(12), mirror housing(11), mirror plate(13) movably associated with the housing, and means for adjusting the mirror plate (shown in fig. 3), with the housing including a one-piece element(19) formed of non-conductive material with conductive strips (conductors shown in figs. 4-13) molded therein. Note also that this one-piece element includes a space would could accommodate a controller and pin-shaped portions (note the projections shown in fig. 3) which secure a mounting plate.

Huizenga does not teach either a folding arrangement for moving the housing with respect to the support or means for providing ancillary function. However, each of these features is well known in conjunction with vehicle mirrors as noted by

Art Unit: 2872

applicant on pages 6-7 of the specification. Note also that mirror folding arrangements commonly include a hollow shaft for accommodating electrical cables. It would have been obvious to the ordinarily skilled artisan at the time of invention to include a folding arrangement to enable folding of the mirror when parking the vehicle and means for performing some sort of ancillary function (e.g. a heater, turn signal light, etc.) to enable these functions in the mirror unit.

Inasmuch as claims 25 and 26 are able to be understood in light of the 112 rejection made above, the method limitations therein would be obvious over the structural features shown by Huizenga.

Response to Arguments

5. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS**

~~ACTION IS MADE FINAL.~~ See MPEP § 706.07(a). Applicant is

Art Unit: 2872

reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
